

LEADERSHIP DEVELOPMENT PROGRAMME

Course overview

This programme is about navigating the space managers find themselves in, as the channel between senior leaders and employees. Managers need to find their True North and use that as a reference as they lead upwards, downwards, transversally and as they step into various roles. This programme will help managers navigate their way as they understand, in detail, each business function and the end-to-end value chain.

Who is this course for?

This programme is aimed at managers who are transitioning from leading teams to leading business units or those who are already leading large teams or business units. The programme will be beneficial and applicable to both the private and public sectors.
